SUMMARY

Applied Mathematics student (Data Science track) with diverse portfolio along with 2+ years of freelance experience in data automation, machine learning, and web development. Built predictive models achieving 87.6% accuracy on imbalanced datasets and led a 3-person team delivering a production booking system. Seeking entry-level Data Scientist/Analyst role.

EDUCATION

Bachelor's Degree in Applied Mathematics (Data Science track)

August 2022 - Present | Far Eastern University (Manila)

Relevant Coursework: Machine Learning, Statistical Analysis, Data Mining and Wrangling, Data Visualization, Cloud Computing, Data Warehousing

EXPERIENCE

Data Entry Clerk (Ebay Trading Cards)

September 2020 - December 2022 | Upwork Freelance

- Managed daily data entry and email newsletters for sports card auctions and pricing.
- Automated recurring tasks using Python (requests, openpyxl), improving efficiency.

Junior Java Web Developer

June 2022 – May 2023 | Upwork Freelance

- Developed web application based on Java Spring Framework with focus on unit and integration testing using Mockito
- Implemented web scraping solutions and managed database operations

Lead Web Developer

March 2024 - June 2024 | Amadeus Music Studios Company

- Led team to develop online booking website for music studio with real-time room availability
- Live site: <http://amadeusmusicstudios.com/HOME/HOME.php>

Survey Designer and Form Handler

April 2024 – May 2024 | Mathematics Society

- Designed and implemented student polling system for campus elections using Microsoft Forms
- Formulated survey questions and validated responses to capture student preferences

SKILLS

(Programming Language)

- Python
- R
- Java
- SQL
- PostgreSQL
- Kotlin

(Technical Skills)

- Strong Mathematics Background
- Machine Learning
- Exploratory Data Analysis
- Data Analytics
- Data Visualization
- Deep Learning (Vision)

(Soft Skills)

- Web Scraping
- Tableau and PowerBi
- Microsoft and Google Suites
- Statistical Testing
- Time Series Analysis
- Spring Boot Framework
- Proficient in Filipino and English
- C1+ advanced on [SmallTalk English Speaking Level Test](#)
- Exacting and Passionate
- Curious and Fast Learner
- Time Management

PORTFOLIO

<https://rebrand.ly/apjsb57>

Tableau Portfolio (My Personal Favorite)

- A set of dashboards and stories showcasing my creativity, depth, and competence in Data Visualizations
- Skills: Data Visualization using Tableau.
- Dashboard: <https://rebrand.ly/945b61>

Cyber Threat Analysis (2015-2024) Dashboard

- A dashboard created using PowerBi and Python to showcase key statistics of various countries recorded cyberattacks.
- Skills: Data Visualization using PowerBi.
- Dashboard: <https://rebrand.ly/vick9sl>

What Makes a Great NBA Player?

- An explanatory analysis that utilized Principal Component Analysis to determine what separates Great from Average NBA Players.
- Skills: Explanatory Analysis
- Github Report: <https://rebrand.ly/b7ngagq>

NBA Archetypes Defined: Clustering Analysis to Playstyles

- Web-scraped NBA player statistics and applied hierarchical clustering to identify 27 distinct player archetypes (Offensive Powerhouse, 3pt Specialist, Rebound Machine, etc.) with 0.327 silhouette score.
- Skills: WebScraping, Clustering Analysis
- Github Report : <https://rb.gy/qnd1iv>

The Harmful Algal Blooms: A Multiple Linear Regression Model of Chlorophyll-a Concentrations in Bolinao, Pangasinan

- Built linear regression model to predict chlorophyll-a concentrations in Bolinao, Pangasinan, improving Adj R² from 0.240 to 0.46 through feature transformation and engineering.
- Skills: Linear Modelling, Data Visualization
- Github Report: <https://rb.gy/4id3q4>

Evaluating Renewable Energy System Reliability with Monte Carlo Simulation

- Validates a model for Renewable Energy System using Monte Carlo Simulation and Inference
- Skills: Statistical Computing/Testing
- Github Report: <https://rebrand.ly/o3r6kbs>

Churner Classifier: A Difficult and Non-Correlated Dataset

- Developed Random Forest classifier for imbalanced (72:28) and inherently uncorrelated data churn dataset, achieving 87.6% accuracy and 15.3% improvement over baseline through extensive feature engineering.
- Skills: Hyperparameter Tuning, Data Visualization, Clustering, Feature Engineering
- Github Report: <https://rb.gy/6rn569>

CSV Data Processor utilizing PostgreSQL and Elasticsearch

- A high-performance Spring Boot application for processing and analyzing CSV sales data with dual storage: PostgreSQL for relational data and Elasticsearch for advanced search and analytics.
- Skills: Kotlin, Spring Boot, PostgreSQL
- Github Report: <https://rebrand.ly/25vslnw>

CERTIFICATIONS

Career Boost with Power BI

Issued February 5, 2025 | Exodus Experts

<https://rb.gy/xd4uwm>

- Introductory course covering Power BI fundamentals and data visualization

Applied Data Science Lab

Issued February 09, 2025 | World Quant University

<https://rb.gy/xe36d2>

- Completed 8 end-to-end data science projects involving SQL/NoSQL databases, APIs, ETL pipelines, and machine learning models
